## SELETTI

The iconic lifestyle brand Diesel and Seletti, the Italian brand globally known for its revolutionary designs, collaborate on a home accessories line. The Diesel Living creative team has worked closely with Seletti on a collection made to be the perfect fusion between Diesel lifestyle and Seletti know-how. A collection inspired by art and music, the street and industrial archeology, banal objects and inspirational masterworks. But above all, real life experiences. Space life has always been a big inspiration for DIESEL, along with the cyber punk industrial approach related to Diesel Living's three reference style pillars: the Dark soul, the industrial Denim and Military world, the Pop side.

The Diesel Living with Seletti range takes its first steps with MACHINE COLLECTION and COSMIC DINER.

**MACHINE COLLECTION DINNERWARE** is a ceramic interpretation of equipment gears and cogs, rendered with toothed edges and impressions, finished with an industrial white. The full collection takes its inspiration from the global imagery of mechanics, and consists of plates, bowls, cutlery, containers, glasses and mugs. A full range meshed together for a full dynamic setting. The perfect complement to the Machine Collection is the DIY cutlery set which finds itself in the kitchen drawer even though could be mistaken for a toolbox utensil. Designed for the moments when you might be inspired to leave the table and head direct to your motorbike for a quick tune up. Knives, forks and spoons, are available in the size of a wrench - 10 to 13 mm.

**TRANSMISSION** candlesticks are inspired by the mechanical parts of industrial machinery, but re-imagined as sculptural pillars. A three pieces collection of candlesticks finished with an aged metallic glaze layer to celebrate industrial decadence and rough luxury aesthetics.

The **GHOST SHELL** is a reinterpretation of a classic glass dome display, in a "punked up" version with half chrome glazed glass and a studded silver painted ceramic base. Perfect for displaying your most valued pop paraphernalia.

**COSMIC DINER** is a visionary collection that includes a set of porcelain dishes, borosilicate glasses, bowls in brass and stoneware, accessories such as grinders, vase and candle holder.

The Porcelain plates represent nine planets, the Sun and the Moon. The table set seems to lack "dimensionality" thanks to these dining plates printed with textures, colors and fantasy filled with beautiful extraterrestrial images. Some prints feature uncommon planet like Callisto and Titan, chosen for their aesthetic values and reworked in order to make them perfect for the Diesel Living galaxy, both for dining moments but also for wall decoration. The Cosmic Diner collection includes bowls, centerpieces, sugar bowls with spoon in shining and brilliant brass, but also bowls and coffee cups in stoneware ...a new dimension and texture for a unique table.

**STARMAN** is emblem of Diesel pioneering spirit. Hence the idea of turning the shape of an astronaut into a china dolomite object to decorate the house, a precious flower vase in white finishing with the astronaut visor in golden brown that convey the vintage effect.

**PPR-078/SLT-055** salt and pepper grinders carry on the galaxy discovery. Inspired by real 60's 70s rockets like famous Saturn-1B. Fascinated by the graphics and color treatment we used these inspiration for the grinders to bring an ironic graphic touch on the table. The mechanisms are composed of ultra-resistant porcelain and stainless steel components; the wooden case is painted with non-toxic paint.

**METEORITE** glasses seem to come directly from outer space; with a faded electroplated gold finishing. The overlap of textures and finishes create a cosmic micro-world and the liquid poured in it reveal the inner shape. They are made of glass blown by skilled craftsmen, with a double chamber to preserve the beverage temperature. Glasses are available in two sizes.

**HARD ROCKETS** are heavy Brass candle holders, which reproduce vintage space rockets souvenirs from Russia. The shape has been designed to be complete when not in use or its silhouette can be modified when used with a candle, with the removable lid that can be used as flame stopper.
